Presents.....

“Parent Child Interaction Therapy”

Speaker:

Kelli Slagle Radermacher

Director of Therapy Services for Choices Counseling & Consulting, Inc.

PCIT is an evidence-based intervention for young children with disruptive behavior. PCIT works with parents and children together to promote a positive parent-child relationship while decreasing the child's behavior problems. Its focus is primarily on increasing attachment and bonding, as well as developing limit setting abilities. This program will help explain PCIT in more depth to increase participants understanding of this specific type of therapy. Kelli provides local training for therapists interested in this model.

Friday, March 14th, 2014
